

Unmanned Tactical Applications Conference Proposal
October 4-8, 2021
Guardian Centers, Perry, GA

TO: _____

I would like to attend the Unmanned Tactical Applications Conference (UTAC) 2021, hosted by FLYMOTION, located at the Guardian Centers in Perry, Georgia. Attending UTAC 2021 will offer me world-class training unparalleled in our field and is the best way to assure our agency is utilizing UAS technology to the best of our ability.

UTAC is a 5-day training conference, covering the end-to-end process of starting, utilizing, and expanding a public safety UAS program. While there, I will be granted the opportunity to discuss policies, procedures, and the unique challenges facing public safety UAS programs with agencies actively utilizing this technology. Through real-world scenarios, classroom training and hands-on flight time, I will learn to utilize techniques such as thermal imaging, best deployment methods, live streaming, integrating UAS into the Incident Command System, 3D mapping and crash scene reconstruction. Public Safety UAS experts will be instructing best practices, hands-on training, new technology innovations, and more. In addition, I will communicate and network with other end users to gain first-hand knowledge of practical, real-world experiences with unmanned systems.

UAS technology is rapidly advancing public safety operations. UAS manufacturers are shifting focus to public safety and developing tools specifically for our operations. As technology is increasingly more powerful and accessible, it is critical to understand how we can leverage its capabilities to make the most of our resources and provide a new standard to public safety.

Below is an approximate breakdown of conference costs:

Airfare: \$ _____
Ground Transportation (between airport and hotel): \$ _____
Hotel: (4 nights at \$91 + tax) ~\$ 400.00
1 meal a day (all others provided): (5 days at \$20) ~\$100
Registration Fee: \$1499.99
Total: \$ _____

Post-conference, I will be sure to provide a summary of UTAC in addition to any takeaways, tips, and recommendations to maximize the return on our current investments in UAS. I am also happy to share relevant information with other staff members and departments.

I appreciate your consideration and look forward to further discussing how my attendance at UTAC 2021 can provide the knowledge and experience needed to train our department in how UAS can save time, funding, and the lives of both civilians and our own personnel.

Sincerely,
